Software Approval

Requestor: Rebecca Weber

Department: Tulare County Department of Child Support Services

Requested Date: 11/30/2024

Application: Instant ID as a Service

Justification for Application: *NOTE: Resubmitting this request because the original has timed out*

Tulare County DCSS is looking to upgrade their current badge printer setup, which consists of a Datacard CD800 printer with Adaptive Issuance Instant ID by Entrust. This printer has reached its end of life, and the client would like to upgrade to a software package that is more user-friendly. The package they would like to upgrade to is a Sigma DS3 Printer with Instant ID as a Service (IIDaaS) by Entrust.

The Sigma DS3 Printer is essentially a newer version of what they currently have, while IIDaaS is entirely cloud-based. The client envisions this printer being setup at the Visalia DCSS office, where one user (Rebecca Weber) would be issued credentials to access the IIDaaS software to make badges for staff. Given that this application is cloud-based, the client would no longer have to download any desktop applications to use the badge printer. They could run print jobs entirely from the web on any county device they may have, however, they would like to limit this to a single computer on site at Visalia DCSS.

The client uses a digital camera to take pictures of any new employee or staff member needing badge access to the building. These pictures are then uploaded to Rebecca Weber's local storage so that she may use them to create the badges on IIDaaS and print using the new printer. The application does not require any integration with Tulare County apps and a majority of the data pertaining to IIDaaS is stored on the cloud, with the exception of pictures that get pulled from the client's digital camera. For reference, I have provided the quote that was received by logistics detailing the printer and software that DCSS is looking to purchase.

How will it be accessed: ["CSE, Oracle HCM (HR data entry)"]

How will data be stored: ["Stored on the PC", "Cloud Storage"]

Any Sensitive Data: No

User Access to other Systems: ["CSE, Oracle HCM (HR data entry)"]
