

Tulare County Health & Human Services Agency

Fiscal Year 2025/2026
Fee Public Hearing

April 8, 2025

Tulare County Health & Human Services Agency

HHSA FY 2025/2026

Fee Requests

- Fee adjustments for the following:
 - Public Guardian
 - Health Care Centers
 - Public Health Immunizations
 - Environmental Health

Human Services Branch

Public Guardian Representative Payee

Description	Current Fee	Requested Fee	Percent Change	Percent Recovery
Representative Payee	\$54	\$55	1.8%	23%

Public Health Branch

Health Care Centers

- As clinic fees are under Federally Qualified Health Center regulations, these fees are based on procedure codes that are governed by the Public Health Service Act which requires that fees be sufficient to cover actual health center costs of operation and consistent with locally prevailing rates or charges.
- The Health Care Centers are proposing:
 - Fifty-Seven (57) new fees
 - One Hundred Fifty-Seven (157) increases
 - Sixty (60) decreases

Public Health Branch

Health Care Centers

Methodology

A survey of local prevailing medical reimbursement rates found Tulare County FQHC comparable rates range from 152% to 568% of Medicare and Medi-Cal reimbursement rates.

Therefore, Tulare County Health Care Centers request to increase the prevailing rate from 150% of Medicare to 200% of Medicare reimbursement rates. If a fee is not Medicare reimbursable, the fee is set at 200% of the Medi-Cal reimbursement rate.

A prevailing rate methodology has been used consistently in establishing Health Care Center fees since 2012. This is the first prevailing rate increase since 2012.

Fee Increase

Description	Current Fee	Requested Fee	Percent Change	Cost Recovery
Haz Waste – Small Quantity Generator	\$266	\$346	30%	68%

The purpose of this program is to protect the health of the public, and the environment, from exposure to hazardous wastes by regulating industries which generate hazardous waste. This is accomplished through a program of inspection, emergency response, surveillance, incident investigation, assistance to industry, enforcement, and public education. There are currently approximately 680 facilities under this health permit in Tulare County. These facilities are required to be inspected every three years for inspection of the handling, storage, transportation, and disposal of hazardous wastes, to take appropriate enforcement action as necessary and to educate all city/county industries and the public as to the legal requirements for handling, storage, and disposal of hazardous waste.

They are also required to submit updated documentation which is reviewed by the CUPA annually and submitted to the state via the California Electronic Reporting System (CERS).

Public Health Branch

Environmental Health

Fee Increase

Description	Current Fee	Requested Fee	Percent Change	Cost Recovery
Tank Facilities >1,320 and <10,000 gallons	\$133	\$200	50%	38%

The purpose of the APSA (Above Ground Petroleum Storage Act) Program is to protect public health, the environment and groundwater from potential contamination or adverse effects associated with unintended releases from the aboveground storage of petroleum-based hazardous materials and waste. There are approximately 150 facilities under this health permit in Tulare County. Inspections are conducted every three years with update reporting required annually for review by the CUPA (Certified Unified Program Agency). Inspections include review of the SPCC (Spill Prevention Control and Countermeasure) plan to verify compliance with proper preparation and implementation of the plan in accordance with 40 CFR 112.1-112.8, and confirmation of annual submittal of a Tank Facility Statement.
