SUBJECT: Approve the Environmental Health Dairy Lab transition

REQUEST(S):

That the Board of Supervisors:

1. Approve the Environmental Health Division to fully transition to the Sierra Dairy Lab as the primary dairy inspection lab, effective March 29, 2022.
2. Approve an attached list of California Department of Food and Agriculture state certified commercial milk labs for emergency purposes.

SUMMARY:

Tulare County Environmental Health Milk Inspection Program conducts dairy inspections and enforcement on all Tulare and Kings County dairies. The Milk Inspection Program was created in 1992. The Tulare County Board of Supervisors approved Resolution No. 92-0233 on February 25, 1992 that granted the division oversight of these dairies in both counties.

Environmental Health currently has a team of Registered Dairy Inspectors who conduct routine dairy inspections of all these dairies. These inspections include the collection of milk and water samples to test for various health required compliance needs identified in the California Codes of Regulations, California Food and Agriculture Code, and the Pasteurized Milk Ordinance. The Tulare County Public Health Lab is currently the primary lab for all milk and water sample analyses associated with Tulare County Environmental Health inspections and enforcement activities. The Sierra Dairy Lab is currently the backup lab to the Tulare County Public Health Lab for these testing services. The Environmental Health Milk Inspection program covers a portion of the associated costs

SUBJECT: Approve the Environmental Health Dairy Lab transition

DATE: March 29, 2022

for two (2) milk technicians, a support staff supervisor, and overhead and equipment expenses for the Tulare County Public Health Lab.

The Milk Inspection program budget is reviewed annually for cost efficiencies. As costs for this program have continued to rise, a pilot plan was developed to transition part of the milk and water analyses to the Sierra Dairy Lab to see if it could improve upon the cost efficiencies. The timing of this pilot was beneficial as the Dairy Program was able to utilize Sierra Dairy Lab to process a large amount of samples during the COVID-19 pandemic which freed the Public Health Lab to focus on critically needed testing services and analyses.

This pilot project has shown a cost savings to the Dairy Program. Environmental Health is requesting to fully transition to the Sierra Dairy Lab as the primary lab and select an appropriate backup lab from the California Department of Food and Agriculture (CDFA) approved list. The backup lab would provide emergency services as well as maintain compliance requirements.

The Sierra Dairy Lab is a commercial lab with a significantly larger volume of clients that can provide these services at a much lower cost. The change in the lab would save Environmental Health approximately \$118,000 per year and is in line with the direction of providing services to the industry in a cost-effective way.

CDFA provides oversight of the local milk inspection programs and requires dairy labs to be certified by their agency. Sierra Dairy Lab is certified by CDFA. CDFA does not require notification for the change in labs; they only ask that we ensure that the labs we use are certified by them. If approved, we would like to complete the transition for fiscal year 2021/2022.

Services to the dairies would remain the same. Inspectors would still pick up the samples from the dairies and deliver them to the analyzing lab. These analyses would still be received in the same reporting manner and given to the dairies in the same timeframes. This is an internal process change and the dairies will notice no change in service with this transition.

FISCAL IMPACT/FINANCING:

Approval of the transition of labs will save the Environmental Health Division approximately \$118,000 per year in personnel and overhead costs. This cost savings will be reflected in the fees and passed onto the dairies. There is no net County cost to the General Fund.

LINKAGE TO THE COUNTY OF TULARE STRATEGIC BUSINESS PLAN:

The County's five-year strategic plan includes a "Quality of Life" initiative. This transition will help fulfill that obligation as it is in line with our Strategic Plan to provide continued improvements of environmental and public health.

ADMINISTRATIVE SIGN-OFF:

SUBJECT: Approve the Environmental Health Dairy Lab transition

DATE: March 29, 2022
